Footage of Citizen Media Rendezvous 09

It took a while in coming, but here is the archived stream of Citizen Media Rendezvous 09! The image quality isn't always pretty to look at, but the audio quality came through great. You'll notice the first two minutes are missing, and the clips aren't cut based on presenter... I'm working through some technical hiccups, but we should have a complete version, split into clips by speaker, by early next week. And we'll also have some other short videos - including interviews with panelists and participants - up over the next couple of weeks.

Enjoy!
