"Here, now, but also there, the artists propose turning the senses both inwards and outwards in an immersive experience of deprogramming expectations. In X-cosmos-X, screens and video overlap, multiplying textures and dimensions to inundate the senses. The underwater environments form a fluid topography, eminently immersive, conducive to contemplation; a wandering cosmos, a transitory state responsive to the flow of matter. In Black Womxn Temporal Portal, the virtual mingles with the IRL [1], forming an Afrofuturist sanctuary where black female, female and non-binary bodies can finally belong. Past, present and future dimensions are incorporated into a timeless vortex, forming a capsule where the mystical memory of a still speculative future can be forged." – Marilou Craft
