GENDER IN THE CITY An opportunity to better understand gender inequality issues in urban spaces

Wednesday, June 7th, 2017, 6 PM to 8 PM @Studio XX

The Consulate General of France in Quebec City and Studio XX (a Montreal-based feminist art centre) will present “**Le genre à l’épreuve de la ville**” [**Gender in the City**], an open meeting dedicated to discussing the place that gender occupies in urban spaces: what influence do cities have on gender inequalities and how can we make our cities more inclusive spaces?

This conference, led by journalist Judith Lussier, will involve contributions from Arnaud Alessandrin, a French sociologist specializing in gender and discrimination, Ianna Book, a Montreal-based artist-activist, and a member of the Conseil des Montréalaises.

These different points of view will offer avenues for reflection and opportunities to make change so that researchers, citizens’ initiatives, artists and politicians can work together to reduce these inequalities.

“Gender in the City” is part of the 2017 programming of the “Science and Society Series: Reinventing Cities”, which was set in motion by the Consulate General of France in Quebec City and the Institut Français.

This event will be followed by an informal discussion period between members of the public and the speakers.

* *The conference room can only be accessed by staircase.*

About the Science and Society Series: Reinventing Cities

Decoding societal issues and promoting discussions between researchers: this is the objective of the *Science and Society Series*. Through these meetings, conferences, debates, and interactive workshops, the Consulate General of France in Quebec City and its partners invite you to reflect on changes in our society. Artists, public figures, and experts from France and Quebec will take part in these discussions in order to compare their different perspectives. This year’s [Science and Society Series](#) programming is focused on cities.

VERNISSAGE AND EXHIBITION OF MEDIA ARTS FOR FAMILIES 2017

Saturday June 10, 2017 | From 2 PM to 4 PM
@ STUDIO XX – 4001, Berri (corner of Duluth) space 201
Bring a snack to share!

Studio XX invites you to discover all the projects produced in the workshops of Media art for families, activities that took place from January to May 2017 !

Guided by Montreal-based artists, the Media art for families initiative brings together children and their parents to have fun programming and designing with electronic technologies. Together families create electronic art!

These creative workshops offer children and adults a chance to discover the back end of media art. Together with the invited artist, they learn and share their knowledge based on a principles of equality in participation; everyone has skills and can be creative. These workshops are designed to bring families together in a playful environment where they can at once, learn from some of artists Studio XX supports, and explore their own creative process in the electronic arts milieu. The activity was free, and participants were encourage to share a snack !

Join us on Saturday June 10th and discover all the artworks produced in each of the workshops :

LIGHT WITH JOSÉE BROUILLARD

Participants have explored the phenomena affecting the propagation of light through a circuit where a light-emitting diode is switched on and modulated. They have created a DIY project where light is the main actor.

MUSÉE DES ONDES WITH ÉMILIE MOUCHOUS

At the Musée des Ondes Berliner, participants have visited the current exhibition Montreal in Space. They have manipulated radios in order to generate Morse code and then communicate with our cell phones...

3D PRINTER WITH SIMON GREFFARD AND RAPHAËL DEMERS – Fab Lab du PEC

Participants have been invited to explore the different possibilities for 3D printing by subverting the primary function of a 3D printer, so instead of producing a 3D plastic object, they have produced something two-dimensional.

KINETIC ART WITH ALICE JARRY

With the aid of motors, Arduinos and various reflective materials, participants have been led to make small kinetic sculptures and explore the light and sound potential of these objects.

VIDEO INSTALLATION WITH OLIVIA MCGILCHRIST

In this workshop, participants have experimented with video mapping on 3D shapes and multi-screen video installations with poetry evocative of the theme of water.

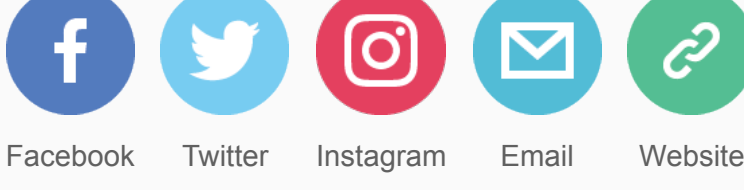

BIOART WITH SARAH CHOUKAH, WHITEFEATHER AND TRISTAN MATHESON

Participants have built basic electronic circuits using the live and colourful unicellular organism Physarum polycephalum to build and document a maze as part of a collective bioart project.

This project receives financial support from the Ministry of Culture and Communications and the City of Montreal as part of the Agreement on the cultural development of Montreal.
